

PROTECT YOUR PRIVATES

# BitDefender 8 Professional Plus

All you need to be secure and spam-free

Price £23 Publisher Editions Profil Web [www.bitdefender.co.uk](http://www.bitdefender.co.uk)

**T**his is the kind of security suite we like to see. No attempts at upsell, no huge gaps in the features that you have to buy add-ons for, no constant nattering about how you're going to die because you use *Internet Explorer*, and a price that actually lives on the same planet as us.

In one box, you get full virus protection for files, PDAs, P2P applications and internet messaging, and with the option to

make a bootable disc in the event of an infection slipping through.

You also get a firewall that checks to see if programs really are what they say they are and puts an end to dangerous scripts, plus a spam filter that can work with whitelists, blacklists and Bayesian filtering, and can look up banned URLs from the net.

Also, it gives you two years' protection for half the price of many of the one-year subscriptions that most apps offer, plus the OK to install it on your other PCs. We heartily approve. **Richard Cobbett**

**Needs** 200MHz CPU, 64MB RAM

**Wants** 1GHz CPU, 128MB RAM

**90%** PCF says... "Excellent protection with a realistic price tag."
